

PAY TO PLAY. TAILS WINS A PRIZE.

YOU

Is it worth playing?

OPERATOR

Earns when you lose.

YOU OBSERVE:

FORECAST: What is $P(\text{heads})$ on the next flip?

DIFFERENT APPROACHES

$P(\text{heads})$

NAÏVE: Assume a fair coin; the setting is just noise.

0.5

FREQUENTIST: Consider only the two flips you saw.

1.0

WHAT THE LLMs SAID:

The carnival coin may favor heads.
Two flips alone are weak evidence.
